## Experience

### • Venture Consultancy Services Pvt Ltd

April 2024 - Present

*DevOps Engineer*

*Lucknow, UP*

- Started as a DevOps Engineer intern and, through strong initiative and quick learning ability, progressively expanded skills to become a full-time DevOps Engineer.
- Proficient in cloud technologies, including Digital Ocean and AWS.
- Experienced with CI/CD tools such as Jenkins, GitLab, and GitHub CI/CD, SonarQube.
- Strong scripting skills in PowerShell, ShellScript, and BashScript.
- Proficient with version control systems, particularly Git.
- Experienced in Docker and NGINX.
- Familiar with Linux distributions including Ubuntu, RedHat, and CentOS.
- Familiar with Hostinger, CPanel, NameCheep server, and GoDaddy.
- Effectively communicated and collaborated with team members.
- Quick to learn and adapt to new development environments.

## Projects/Server Created

### • Internship Projects

- Created two real-time running projects during the internship: Mathsmama (an application) based in India and NELEULEX (a website) based in Dubai.

### • Automated CI/CD Pipeline for a Microservices Application

- Set up a complete CI/CD pipeline using Jenkins or GitLab CI.
- Included automated testing and deployment to multiple environments (dev, staging, production).

### • Multi-Cloud Deployment Strategy

- Designed and implemented a strategy for deploying applications across multiple cloud providers.
- Used abstraction layers or cloud-agnostic tools to manage multi-cloud deployments.
